DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Albert Penilla on 4 March 2007 at approximately 12:45 PM EST.

The application has been amended as follows (Amendment is underlined and bold-faced):

Claim 26:

A computer-implemented method for processing computer programs selectively operable on one or more selected individual processors, comprising:

programming an instruction decoded to accept instruction op codes in excess of a set of instruction op codes required for execution of a program;

providing plural answers from the instruction decoder, including plausible wrong answers; and

selecting and using a predetermined buffer, thereby permitting further operation with a selected one of the plurality of answers.

2. The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance of claims 26 and 41 in the instant application rest at least in the combination with the inclusion of the limitation that "...providing plural answers from the instruction decoder, including plausible wrong answers." The prior art of record neither anticipates nor renders obvious the above-recited combination.

Because claims 27- 29, 31-40, and 42-43 depend directly or indirectly on any of the claims 26 and 41, these claims are considered allowable for at least the same reasons noted above with respect to claims 26 and 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
